BREAKTHROUGH

# OVERVIEW.

**BREAKTHROUGH, measuring 118.8m (389.9ft), is Feadship's most ambitious and technologically advanced superyacht, representing a new benchmark in sustainable design. The brief was to build the greenest and most environmentally advanced yacht ever built without compromise, and BREAKTHROUGH delivers on every level.**

Designed by British RWD Studio, it is the first superyacht powered by hydrogen fuel cells, enabling a completely zero-diesel approach. Emission-free power from green hydrogen allows the yacht to cruise between harbours, anchorages, and sensitive marine zones without environmental impact.

With five decks above the waterline and two below, BREAKTHROUGH is the largest motor yacht ever built in the Netherlands. She also has the most hull openings of any Feadship to date including fourteen balconies that slide out from the 'tweendeck space, five massive shell doors, and seven large opening platforms, all of which create an impressive connection to the sea. The balconies are unnoticeable when closed but slide out at the touch of a button, carrying with them their side railings or walls. When fully deployed, their floors rise to become perfectly level with the interior room.

The yacht's design was tailored for family use, with the owners' deck above the bridge serving as a private apartment with two bedrooms, twin bathrooms, dressing rooms, a gym, two offices with fireplaces, and a living room. A full walkaround deck offers shaded spaces fore and aft, including a forward jacuzzi for dining and relaxation. Extending over multiple levels, the owner's accommodation is connected by a private vertical corridor with a staircase, display nooks, and an elevator. Each level provides private lifestyle amenities (think a coffee corner and games area, a library on the main deck, and a private dining room with a sea terrace on the lower deck), giving an overall feel of a secluded townhouse-style retreat.

The interior design utilises light neutrals in textured fabrics, marble, rattan, fumed and taupe eucalyptus, and limed oak to evoke a refined coastal atmosphere. Repeating details, like trim and railing shapes, unify the design across each deck while varying the materials for visual interest.

## Key features

---

**The world's first hydrogen fuel-cell superyacht**

---

**Highly detailed interior and exterior design by the award winning RWD**

---

**Private owner's apartment stretching over multiple decks for complete privacy**

---

**Up to 30 guests in 15 cabins**

---

**Fully certified 7T helideck**

---

**World leading pool deck, beach club, and wellness facilities**

---

**A unique opportunity to own the most advanced superyacht by Feadship**
